

# Model Catalog

The model catalog shows a list of all of the available medieval/renaissance assets. This includes all of the assets installed in Pragma, as well as all of the assets available through your installed Source Engine (and Source 2) Steam Games.

You can open the model catalog from the menu bar via **Windows > Model Catalog**. The first time you open the model catalog, or a new directory in it, Pragma may run slow for a few seconds while it's generating the model intros.

and press enter. The items will be displayed in the order of most similar to least similar.

# Scene-Drop

If you want to place an object from the model catalog, you can simply drag-and-drop it into the scene and an actor will be created for it:
